Model for *Pinus sylvestris* stands
High Ebro Basin (Spain)

Model

Psylvestris_stand_High_Ebro_Basin_v01.py

Model description

- Specie: *Pinus sylvestris* L.
- Spanish Forest Inventory (SFI) code: 21
- Geographical area: High Ebro Basin
- Geographical area (administrative): Burgos and Álava

Model type

- Category: stand growth
- Model level: stand
- Reproduction methods: seedling forest
- Stand structure: even-aged stands
- Species composition: monospecific stands
- Forest origin: natural and plantation

Model requirements and recommended use

- Initial inventory requirements: age, mean height and density of the plot
- Geographical area: Burgos, Álava, closer places and another places with similar characteristics (assuming differences)
- Stand type: monospecific stands
- Execution recommended time: 5 years executions (survival and growth equations developed by using that criteria)
- Site Index is defined as top height at a base age of 100 years

Bibliography

Complete SIMANFOR model recommended citation):

SIMANFOR (2022). Stand growth model for scots pine (*Pinus sylvestris*) in High Ebro Basin (Spain).

Model components:

- **Calculations by using tree data** (just in cases when that information is not available at the initial inventory):
  Density and Dominant Height
- **Site Index and Quality Index equations**:
  Bravo F (1998). Modelo de producción para Pinus sylvestris L. en el Alto Valle del Ebro
- **Dominant Height Growth equation**:
  Bravo F (1998). Modelo de producción para Pinus sylvestris L. en el Alto Valle del Ebro
- **Basal Area Growth equation**:
  Bravo F, Montero G (2003). High-grading effects on Scots pine volume and basal area in pure stands in northern Spain. Annals of forest science, 60(1), 11-18
- **Volume and Volume Growth equation**:
  Bravo F, Montero G (2003). High-grading effects on Scots pine volume and basal area in pure stands in northern Spain. Annals of forest science, 60(1), 11-18
- **Quadratic Mean Diameter equation**:
  Bravo F, Montero G (2003). High-grading effects on Scots pine volume and basal area in pure stands in northern Spain. Annals of forest science, 60(1), 11-18
- **Value for Reineke Index equation**:
  del Río M, Montero G, Bravo F (2001). Analysis of diameter–density relationships and self-thinning in non-thinned even-aged Scots pine stands. Forest Ecology and Management, 142(1-3), 79-87
- **Hart Index equation**:
  Standard equation
- **Harvest equations**:
  Harvest equations developed by using equations mentioned before.
