Model for *Quercus robur* stands Galicia (Spain)

Model

Qrobur_stand__gal__v01.py

Model description

- Specie: *Quercus robur* L.
- Spanish Forest Inventory (SFI) code: 41
- Geographical area: Galicia
- Geographical area (administrative): A Coruña, Lugo, Pontevedra and Ourense

Figure 1: *Quercus robur*

Figure 2: Details of *Quercus robur*

Model type

- Category: stand growth
- Model level: stand
- Reproduction methods: seedling forest
- Stand structure: even-aged stands
- Species composition: monospecific stands
- Forest origin: natural

Model requirements and recommended use

- Initial inventory requirements: age, dominant height and density of the plot
- Geographical area: Galicia, closer places and another places with similar characteristics (assuming differences)
- Stand type: monospecific stands
- Execution recommended time: 1 year executions (survival/ingrowth and growth equations developed by using that criteria)
- Site Index is defined as top height at a base age of 50 years

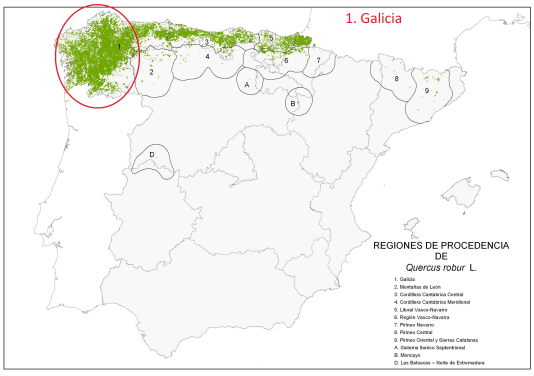

Figure 3: Provenance regions of *Quercus robur* in Spain

Bibliography

Complete SIMANFOR model recommended citation):

SIMANFOR (2022). Stand growth model for european oak (*Quercus robur*) in Galicia (Spain).

Model components:

- **Calculations by using tree data** (just in cases when that information is not available at the initial inventory):
  Density and Dominant Height
- **Site Index and Quality Index equations**:
  Anta MB (2003). Crecimiento y producción de masas naturales de" Quercus robur" L. en Galicia (Doctoral dissertation, Universidade de Santiago de Compostela)
- **Dominant Height Growth equation**:
  Anta MB (2003). Crecimiento y producción de masas naturales de" Quercus robur" L. en Galicia (Doctoral dissertation, Universidade de Santiago de Compostela)
- **Survival and Ingrowth equations**:
  Anta MB (2003). Crecimiento y producción de masas naturales de" Quercus robur" L. en Galicia (Doctoral dissertation, Universidade de Santiago de Compostela)
- **Initial and Growth Basal Area equation**:
  Anta MB (2003). Crecimiento y producción de masas naturales de" Quercus robur" L. en Galicia (Doctoral dissertation, Universidade de Santiago de Compostela)
- **Initial and Growth Volume equation**:
  Anta MB (2003). Crecimiento y producción de masas naturales de" Quercus robur" L. en Galicia (Doctoral dissertation, Universidade de Santiago de Compostela)
- **Mean Height equation**:
  Anta MB (2003). Crecimiento y producción de masas naturales de" Quercus robur" L. en Galicia (Doctoral dissertation, Universidade de Santiago de Compostela)
- **Mean Diameter equation**:
  Diéguez-Aranda U, Rojo A, Castedo-Dorado F, et al (2009). Herramientas selvícolas para la gestión forestal sostenible en Galicia. Forestry, 82, 1-16
- **Quadratic Mean Diameter equation**:
  Anta MB (2003). Crecimiento y producción de masas naturales de" Quercus robur" L. en Galicia (Doctoral dissertation, Universidade de Santiago de Compostela)
- **Value for Reineke Index equation**:
  Anta MB (2003). Crecimiento y producción de masas naturales de" Quercus robur" L. en Galicia (Doctoral dissertation, Universidade de Santiago de Compostela)
- **Hart Index equation**:
  Standard equations
- **Harvest equations**:
  Harvest equations developed by using equations mentioned before.
